PROJECTS

Restaurant Management Web App(FOODY) [🔗](#) | [MERN Stack](#) 2024

- Organized frontend components into a modular structure (e.g., Menu, Reservation Form, Order Summary) for re-usability and maintainability.
- Implemented server-side logic for handling CRUD operations, authentication, and authorization, following RESTful API principles.
- Defined MongoDB schemas using Mongoose to structure and interact with restaurant data efficiently.
- Utilized middleware functions for request validation, error handling, and authentication checks on the server-side.
- Proficiency in full-stack web development using React, Node.js, Express, and MongoDB.

Sneaker Shop Web App(.sneakers) [🔗](#) | [HTML, CSS, Javascript, IDE - VS Code](#) 2024

- A display page consisting of a collection of sneakers with images, names, prices, and brief descriptions.
- Provided a detailed information about each sneaker, including size options, color variants, and customer reviews.
- Ensured that the web application is fully responsive and optimized for various devices and screen sizes.
